

## Institute of Physics

<http://jpcs.iop.org>

--- see the set of links on the left of the home page.

In terms of cost, there are two components:

**(a) online open access publication**

**(b) prices for physical products ---- softback/hardback printed copies or CDs**

(a) online open access publication

=====

Every conference is published as an open access online volume and the cost for this is based on a small fee per article, which includes:

- \* open access, all articles are free after publication
- \* creation of online versions of the abstracts contained in each paper
- \* creation of hyperlinked references and tracking of future citations
- \* unlimited number of pages in each article
- \* unlimited use of colour online
- \* extra multimedia items (e.g. simulations)
- \* online publication typically within 4 to 6 weeks of receiving final files

The current cost per article is USD 44 per paper. This includes unlimited pages, ability to include multimedia items with the papers etc.

**To cover our costs, there is a minimum online fee equivalent to 20 papers = USD 880 so any proceedings < 20 papers will cost USD 880. Any papers > 20 are at the standard fee of USD 44.**

As part of our service you will be given a secure login to our pre-publication servers to check the proceedings prior to publication --- this typically takes about 2 to 3 weeks from sending us the final files.

(b) prices for physical products ---- softback/hardback printed copies or CDs

=====

=

We offer softback/hardback printed copies for distribution to participants etc, or CDs containing the proceedings.

To provide a quote for these I will, as you say, need to have some additional information. Rather than listing it here, the following web page lists the data we need:

<http://www.iop.org/EJ/journal/-page=extra.2/1742-6596#quote>

One thing worth mentioning is that the biggest advantage of softback books is that the covers can include full-colour images at no extra cost. Colour on hardback covers is very expensive.

I hope that the above has provided enough information, do please let me know if I can be of further help. Once again, thanks for contacting IOP Publishing

My best wishes

## American Institute of Physics

Dear Shaul,

Thanks for the information. Here is our Proposal for the above Workshop to be held in Boulder, Colorado on August 25-28, 2009. :

Version 1.

**We can publish proceedings as a print book. The price for the 200-250 pages, soft laminated cover book of the 6 3/8 x 9 1/4 inches with order of 50-75 copies will be \$ 45 per copy.**

**[75x45 = \$3375]**

The online version will be published simultaneously with the print book at no extra charge, and all the conference participants will have a free unlimited access for one year . The printed book and its online version will have the Volume number in the AIP Conference Proceedings Series, ISSN and ISBN, and will be registered at the Library of Congress. We send two copies of the print proceedings to the Library of Congress holdings in perpetuity. There will be AIP's Copyright. AIP will design the cover and the front matter, unless you chose your own design with some mandatory elements of the AIP Conference Proceedings Series to be present. The standard AIP cover will be navy-blue, with gold stamping. But you can chose to have a color cover at no extra charge.

AIP will produce covers, front matter, table of contents, Authors Index, will paginate the book. All color graphics will be included. We accept and produce multimedia files.

Version 2.

**We can publish online only (e-book) for a fixed price of \$1,500.** All color graphics will be included. The e-book will have Volume number, ISBN, ISSN, and will be registered in the Library of Congress. If you order this version, we will produce for you 2 complimentary (no fee) copies of the soft - cover print book .

The publication time will be 8-13 weeks (or sooner) from the submission of the complete manuscript. If you need the proceedings published before the conference, we would need the complete workable manuscript at least 7-8 weeks before the event. If you wish, AIP will include, free of charge, your event in the "Physics Today" Online Calendar of Events, so that your event will have a great international exposure and will attract a wider participation.

At present, AIP has published about 1000 Volumes in our Conference Proceedings Series. More information can be found at: [www.aip.org/proceedings](http://www.aip.org/proceedings) AIP proceedings are indexed in several major databases.

Please let me know which version of our proposal you want to choose. I can prepare and send a Publishing Contract and include your proceedings in the AIP Publication Plan. I also will be happy to help with your questions and requests. I hope to hear from you soon and look forward to the opportunity to working with you on the publication. Thank you.

Best regards,

Maya
